

**Figure 1: FSIS Testing For CNS Tissue (Spinal Cord) in Beef AMR
(2002 - 2005)**

(a) Results from 2002 survey. A positive could be for either spinal cord, DRG, or both. The 2003 - 2005 results are the percentage of spinal cord positives in random verification samples.

**Figure 2: FSIS Testing For DRG in Beef AMR
(2002 - 2005)**

(a) Results from 2002 survey. A positive could be for either spinal cord, DRG, or both.

(b) The 10.9 percent is based on 579 samples that were a mixture of random verification samples and follow-up samples.
